

Transforming patient care through innovation, together.

About CareView

For over a decade, CareView® has been dedicated to supporting hospital care teams with innovative virtual care solutions.

With successful partnerships with 200+ hospitals nationwide, we have implemented effective inpatient virtual care strategies, greatly enhancing patient safety and overcoming critical staffing challenges.

The CareView platform, fueled by industry-leading technology and supported by its purpose-built hardware, specifically addresses the unique requirements of **virtual nursing** and **virtual sitting** use cases.

We work closely with our hospital partners to understand their evolving needs and deliver tailored virtual care strategies that align with their objectives.

By providing healthcare professionals with the tools they need to deliver exceptional care, we contribute to improved patient outcomes and a more sustainable healthcare ecosystem.

Our Collaborative Effort

The partnership between CareView and health systems across the country is a testament to our shared commitment to patient safety and innovation in healthcare.

Through this collaboration, we aim to:

Transform Patient Care

CareView's patented technology predicts and reduces inpatient falls while alerting staff to patients at risk.

Enhance Patient Safety

Our virtual monitoring system continuously watches over patients, ensuring rapid response to potential risks.

Promote a Culture of Safety

By leveraging CareView's solutions, we create a safer healthcare environment for all.

Our Impact

Our efforts have a profound impact on patient care in the regions we operate in. Our solutions reduce patient falls and reduce patient sitters, ultimately saving resources in each system we operate in. We also provide on-site support and service, regardless of where you are located.

Our Collaborative Efforts

We work on-site with our partners to provide customer support. We also have the ability to build out custom integrations with our solutions and their existing EHR and technological platforms. This customer-centric approach is at the heart of what we aim to provide.

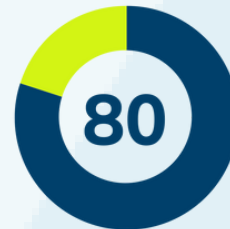

A Closer Look: CareView's Virtual Sitting Solution

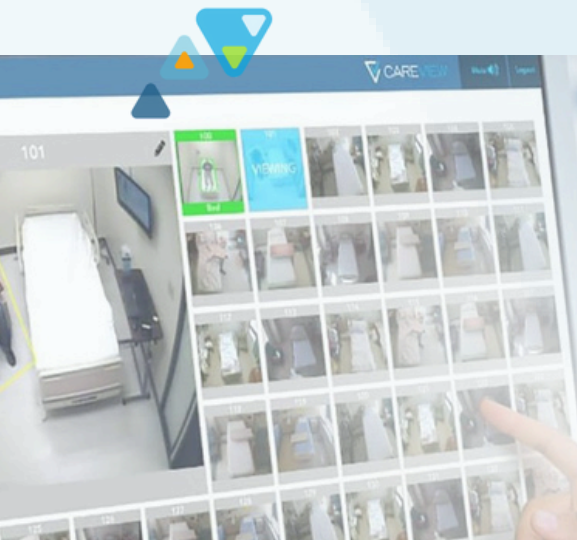

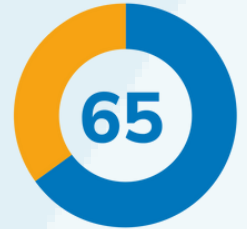

Enhance Patient Safety Through Virtual Observation

At CareView, we offer a cutting-edge virtual sitting solution that leverages our patented predictive technology to mitigate the risk of falls and ensure heightened patient safety. Through continuous monitoring of multiple patients from a centralized location, our solution proactively prevents falls and enables healthcare providers to deliver optimal care while maintaining a streamlined workflow.

Reduce Patient Falls by 80%

65% Reduction in Patient Sitters

Discover the Power of Virtual Sitting with CareView®

At CareView, we offer a cutting-edge virtual sitting solution that leverages AI and our patented predictive technology to mitigate the risk of falls and ensure heightened patient safety.

One Platform. Numerous Use Cases.

CareView Platform

Virtual Sitting Solution

Virtual Nursing Solution

Through continuous monitoring of multiple patients from a centralized location, our virtual sitting solution proactively prevents falls and enables healthcare providers to deliver optimal care while maintaining a streamlined workflow.

Monitor 25-35 Patients at Once

Simultaneously monitor patients with efficiency through patented predictive technology, harnessing AI and machine learning to ensure patient safety and well-being.

Fall Prevention and Reduction

Proactively prevent falls, reducing the risk of patient injuries and improving overall patient safety.

Lower Physical Sitter Costs

Reduce the need for physical sitters, resulting in cost savings for healthcare facilities while maintaining high-quality patient care and safety.

Monitor Behavioral Patients

Monitor and ensure the safety of behavioral patients who may require additional attention and support.

Continuous 24/7 Monitoring

Continuous round-the-clock monitoring of patients offers an additional layer of safety and security.

Detect Elopement and Delirium

Detect and prevent patient elopement and delirium, allowing healthcare providers to intervene in a timely manner and ensure patient safety.

Low-Risk Suicidal Ideation

Monitor and care for patients with low-risk suicidal ideation, providing an added level of support and reducing the risk of self-harm.

Staff and Patient Safety

Enhance staff and patient safety by reducing the need for physical sitters and utilizing virtual monitoring to create a secure environment.

By harnessing the power of advanced AI technology and continuous monitoring, we enable healthcare providers to proactively prevent falls and enhance overall patient care, **resulting in cost savings.**

Competitor Comparison

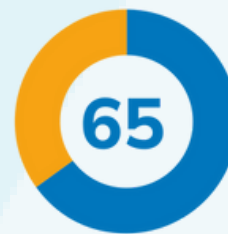

Example: Using 100 Camera Monitoring

	CareView®	Competitor
Virtual Monitoring Techs (VMT) Needed	3	9
VMT FTE's Required Annually	12.6	37.8
Annual Costs (\$20/hr per FTE)	\$523,152	\$1,569,456
ANNUAL SAVINGS with CareView		
\$1,046,304		

Reduce Patient Falls by 80%

65% Reduction in Patient Sitters

CareView Platform Software

The CareView platform is a game-changer in the world of virtual nursing and virtual sitting and virtual nursing. Fueled by industry-leading AI and supported by purpose-built hardware, it is specifically designed to meet the unique requirements of crucial healthcare use cases.

- Integration-ready Platform
- Customizations
- Analytics Dashboard and Reporting
- Configuration Options
- Quarterly Software Updates (at no cost)
- Proactive Monitoring and Maintenance
- 24 x 7 x 365 Support
- Dedicated Customer Success Manager

Ready to Discover How
Virtual Sitting Can Support
Your Care Teams?

Connect with your National Account Manager to take you through a tailored virtual sitting demonstration of the CareView platform.

Discover the Power of Virtual Nursing with CareView®

We are thrilled to announce CareView's platform, which serves as your foundation for patient observation needs, has taken a monumental leap forward.

Our platform now features a robust Virtual Nursing Solution

CareView Platform

Virtual Sitting Solution

Virtual Nursing Solution

And, it's already seamlessly integrated within your existing CareView platform.

CareView's virtual nursing solution is designed to support your care teams by reallocating professional nursing and administrative tasks to virtual Registered Nurses (vRNs).

Admissions

vRNs can remotely assess patients, review medical history, medication reconciliation and coordinate necessary care transitions, ensuring a smooth and efficient admission experience.

Discharge

vRNs can provide post-discharge instructions, medication reconciliation, and answer patient questions remotely, promoting a seamless transition from the hospital to home care.

Patient Education

vRNs can provide valuable health information, explain treatment plans, and answer patient queries virtually, empowering patients to actively participate in their care.

Virtual Rounding

vRNs can conduct virtual rounds, assessing patient status, addressing concerns, and coordinating necessary interventions, leading to improved care coordination and patient satisfaction.

Nurse Mentoring

vRNs with extensive experience can provide guidance, share knowledge, and support novice nurses remotely, fostering a culture of continuous learning and professional advancement.

Clinical Oversight

vRNs monitor protocols such as sepsis or hospital-acquired infections, detect worsening conditions for timely intervention, averting rapid responses or codes, leading to improved patient outcomes.

Telehealth

vRNs enable remote patient assessment, virtual medical consultations, and tailored care recommendations, ensuring access to quality healthcare regardless of patient location.

Case Management

vRNs can remotely collaborate with case managers to review patient progress, coordinate care services, and facilitate timely and efficient care transitions.

This strategic shift not only alleviates the burden on bedside nurses but also optimizes resource allocation, mitigates nurse burnout, and enhances patient engagement and satisfaction, resulting in cost savings.

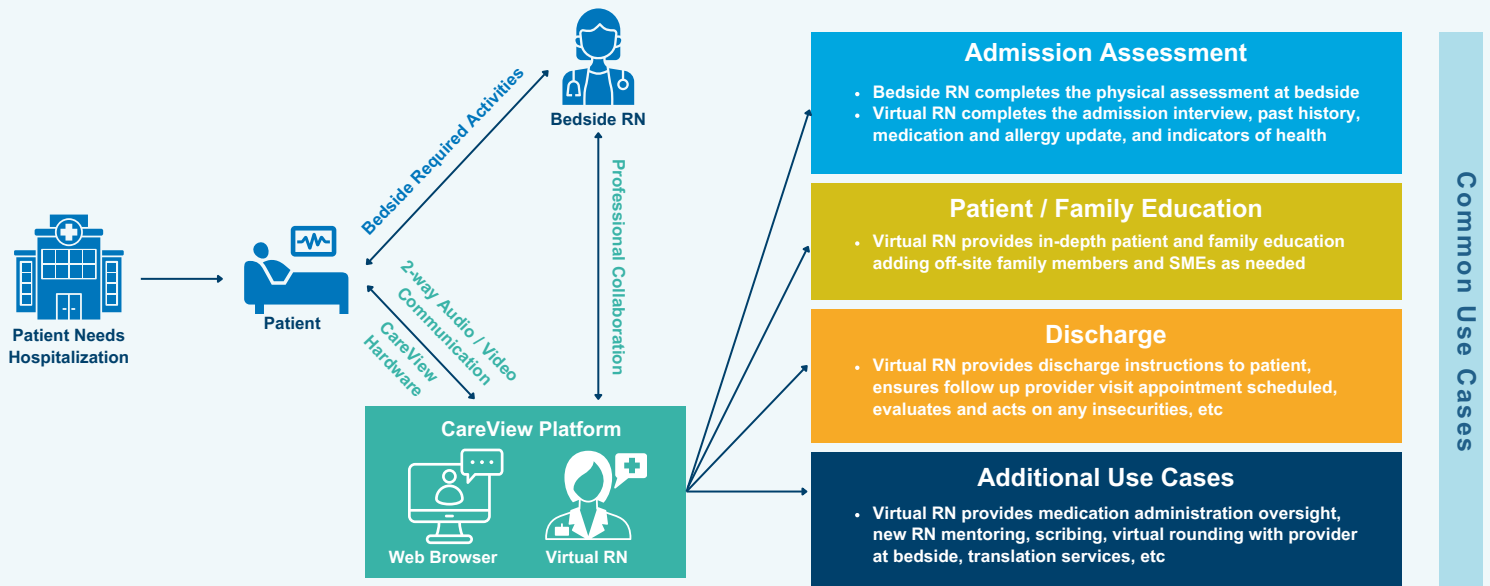

Key Performance Indicators for Virtual Nursing

KPI	Metric Goal	Baseline Example	Improvement Target
Admission time (average minutes)	Decrease time to admit patient	150	Decrease by 30 min
Discharge process time (average minutes)	Decrease time to admit patient	120	Decrease by 30 min
Discharge time of day (average hour of discharge)	Discharged patients out before noon	3:00pm	11:00am
Decision to admit to inpatient room time (average minutes)	Improve ED throughput with faster transfer to IP	350	120
Nurse turnover rate	Decrease nurse turnover rate	28%	15%
Nurse satisfaction rate	Improve nurse satisfaction scores	65%	90%
Travel RN usage (number of contracted staff due to shortage)	Decrease the number of Travelers	42	12
Bedside RN:patient ratios	Increase ratio through task centralization	1:5	1:6
Patient satisfaction scores (national average=3.24)	Improve HCAHPS scores (highest possible=5)	3.12	3.85

VIRTUAL CARE PLATFORM

Virtual Sitting | Virtual Nursing

**ONE PLATFORM.
NUMEROUS USE CASES.**

Meet the Patient Care System by CareView®
A “plug and play” platform tailored to your workflows.

30% Cost Savings

Clients typically have a 30% cost savings when switching to CareView®.

- Savings on hardware and software op-ex
- All platform updates included in standard pricing

Double Monitoring Capacity

With CareView®'s patented predictive technology, hospitals can now safely double their current monitoring capacity without adding any additional FTE's.

- CareView®'s software uses Intelligent Predictive Monitoring that leverages AI and Machine Learning
- 1 Virtual Monitor Tech (VMT) can safely monitor 25-35 patients based on acuity

Lifetime Hardware Warranty

CareView®'s proprietary hardware is designed and engineered by CareView® for patient care.

- Lifetime warranty for all products are included in standard pricing - no additional or hidden costs

Dedicated Support

Clients receive 24x7x365 support at no additional costs - no travel charges, no trip fees.

- On-going dedicated Customer Support Manager
- Seamless onboarding and training
- Proactive platform optimization approach

Seamless Integrations

CareView® offers software integrations at no additional cost to clients.

- EMR Integrations with Epic, Cerner, Meditech, Allscripts, etc
- Communication Device Integrations with Vocera, Hillrom, Rauland, iMobile, etc
- In-room Interactive TV Integrations with Sonifi Health, GetWell, etc
